Summary

Frontend Engineer with 3+ years of experience building production React and Next.js applications for complex, multi-role products. Strong in TypeScript, component architecture, API-driven workflows, and real-time UI patterns. Comfortable owning features from requirements through polished delivery, collaborating closely with design and backend teams, and improving performance, reliability, and maintainability across the frontend.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Context API, TanStack Query, Tailwind CSS, Material UI, Shadcn UI

Data & APIs: REST APIs, Axios, Socket.IO, WebSockets

Backend & Data: Node.js, Express.js, MongoDB, MySQL

Tools: Git, GitHub, Postman, Vercel

Other: i18next (i18n/RTL), Responsive Design, State Management, Performance Optimization, Code Splitting, Lazy Loading

Projects

Pixora – AI Photo Editor

Tekrai

Next.js, React.js, TypeScript, Tailwind CSS, NextAuth, Prisma, MongoDB, ImageKit, Stripe, Framer Motion

- Built an AI photo editor with Next.js, Google OAuth, and Prisma/MongoDB usage tracking.
- Integrated ImageKit for signed uploads and AI transforms with free-plan usage limits.
- Added Stripe Checkout and webhooks for Free/Pro plans and quota enforcement.

AI SpEd Insight Platform

Tekrai

Next.js, React.js, TypeScript, TanStack Query, Tailwind CSS, Zustand, WebSockets, Axios

- Owned frontend delivery for a multi-role Texas SpEd platform spanning district workflows and Super Admin tooling, with RBAC and protected routing across role-specific dashboards.
- Built end-to-end IEP workflows including upload, AI extraction review, HB 2 intensity scoring, Needs Review resolution, and PEIMS/TWEDS-ready export gates.
- Designed responsive data flows using TanStack Query and WebSockets so extract/score pipelines stay synchronized without brittle polling or stale UI state.

Loadout Marketplace Platform

Tekrai

React.js, TypeScript, Vite, TanStack Query, Tailwind CSS, Zustand, Socket.IO, Axios

- Delivered a multi-role marketplace with separate user and admin experiences, role-based access, and protected routes for buyers, sellers, and operators.
- Implemented core commerce workflows including listing creation/editing, category browsing, saved products, seller profiles, and ratings.
- Integrated REST APIs with Socket.IO-powered chat and notifications to keep marketplace interactions responsive and in sync across sessions.

React.js, Redux Toolkit, Tailwind CSS, i18next

- Built a bilingual English/Arabic portal with full RTL support and shared component patterns that stayed consistent across locales and screen sizes.
- Structured reusable UI and state patterns so language switching did not break layout, navigation, or form behavior.

Construction Management System*BuildAi360*

React.js, Redux Toolkit, JavaScript

- Developed dashboards, reporting views, and data visualization surfaces used by teams to monitor project progress and operational metrics.
- Integrated REST APIs and reduced unnecessary re-renders to keep data-heavy screens responsive under frequent updates.

Experience

Tekxai — Frontend Engineer*Jun 2025 – Present*

Lahore, Pakistan

- Own frontend feature delivery for production React/Next.js products, from UI implementation through API integration and release-ready polish.
- Partner with designers and backend engineers to ship multi-role workflows, auth-aware routing, and reliable client-side state handling.
- Improve maintainability by building reusable TypeScript components and consistent data-fetching patterns with TanStack Query and Zustand.
- Strengthen UX quality through responsive layouts, loading/error states, and performance-minded rendering on complex screens.

BuildAi360 — Frontend Developer*Jan 2023 – Jun 2025*

Lahore, Pakistan

- Built and iterated on responsive React/Next.js applications used for operational dashboards and business workflows.
- Translated product requirements and designs into reusable components with predictable state management via Redux Toolkit.
- Integrated third-party and internal APIs, including real-time Socket.IO features for live updates and collaboration-style UX.
- Improved frontend performance by reducing unnecessary re-renders and tightening component boundaries on data-heavy views.

Education

Bachelor of Science in Computer Science (BSCS)

Comsats University Islamabad, Vehari Campus

*Feb 2018 – Feb 2022***Currently Learning**

Node.js, Express.js, MongoDB, PostgreSQL, Prisma, and Next.js backend architecture — expanding toward stronger full-stack delivery.
