Summary

Frontend Engineer with 3+ years of experience building production web applications with React.js, Next.js, TypeScript, and REST APIs. Experienced in multi-role platforms, data-heavy dashboards, reusable component systems, state management, RBAC, real-time interfaces, and frontend performance optimization. Strong collaborator across design, product, and backend teams.

Technical Skills

Core: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
State & Data: TanStack Query, Redux Toolkit, Zustand, Context API, REST APIs, Axios, WebSockets, Socket.IO
UI: Tailwind CSS, Material UI, Shadcn UI, Responsive Design, React Hook Form
Backend & Tools: Node.js, Express.js, Prisma, MongoDB, PostgreSQL, Git, GitHub, Vercel
Other: RBAC, OAuth, NextAuth, Stripe, Performance Optimization, Code Splitting, Lazy Loading

Professional Experience

Frontend Engineer, Tekxai

Jun 2025 – August 2026

Lahore, Pakistan

- Own frontend feature delivery across 4 client platforms using React.js and Next.js, from UI implementation and API integration through release-ready delivery.
- Build multi-role workflows and authentication-aware routing with Role-Based Access Control (RBAC), supporting 3–5 distinct user roles across client platforms.
- Developed 30+ reusable TypeScript components and standardized data-fetching patterns with TanStack Query and Zustand, reducing duplicated frontend logic across projects.
- Improved data-heavy dashboard UX through responsive layouts, loading/error states, code splitting, lazy loading, and performance-focused rendering.
- Collaborate with backend developers, UI/UX designers, and product stakeholders to translate requirements into scalable, production-ready frontend features.

Frontend Developer, BuildAi360

Jan 2023 – Jun 2025

Lahore, Pakistan

- Built and maintained responsive React.js and Next.js applications for operational dashboards and business workflows across 2+ products.
- Translated product requirements and UI designs into reusable TypeScript/JavaScript components with predictable state management using Redux Toolkit.
- Integrated internal and third-party REST APIs with Axios and implemented real-time Socket.IO features for live updates and collaboration workflows.
- Improved frontend performance by reducing unnecessary React re-renders and optimizing component boundaries across data-heavy views.

Selected Projects

AI SpEd Insight Platform

Next.js, TypeScript, TanStack Query, Zustand, WebSockets

- Owned frontend delivery for a multi-role platform with RBAC, protected routing, and 4 role-specific dashboards.
- Built end-to-end IEP workflows and real-time extraction/scoring updates using TanStack Query and WebSockets.

Loadout Marketplace Platform

React.js, TypeScript, TanStack Query, Zustand, Socket.IO

- Delivered a multi-role marketplace with separate buyer, seller, and operator experiences, including RBAC and protected routes.
- Implemented product listings, category browsing, saved products, seller profiles, ratings, real-time chat, and notifications.

Education

Bachelor of Science in Computer Science (BSCS)

Feb 2018 – Feb 2022

COMSATS University Islamabad, Vehari Campus
