Summary

Frontend Engineer with 4 years of professional experience building production web applications using React.js, Next.js, TypeScript, and JavaScript (ES6+). Experienced in scalable component architecture, REST API integration, state management, RBAC, authentication, realtime interfaces, responsive UI, accessibility, testing, and frontend performance optimization. Experienced in AI assisted development workflows and modern engineering tools, with strong collaboration across backend, UI/UX, and product teams.

Professional Experience

Frontend Engineer – Tekxai *Jun 2025 – Aug 2026* | *Lahore, Pakistan*

- Owned frontend delivery across multiple clients platforms using React.js and Next.js, collaborating with backend developers and UI/UX designers on UI implementation and API integration.
- Built multirole workflows and authentication aware routing with Role Based Access Control (RBAC), supporting 3–5 distinct user roles across client platforms.
- Developed 30+ reusable TypeScript components and standardized data fetching patterns using TanStack Query and Zustand, reducing duplicated frontend logic and improving maintainability across projects.
- Improved data heavy dashboard UX through responsive layouts, loading, error states, code splitting, lazy loading, and performance focused rendering; mentored 5 junior developers through code reviews, pair programming, documentation, and onboarding.

Frontend Developer – BuildAi360 *Jan 2023 – Jun 2025* | *Lahore, Pakistan*

- Built and maintained responsive React.js and Next.js applications for operational dashboards and business workflows across 2+ products.
- Translated product requirements and UI designs into 30+ reusable TypeScript components, reducing feature development time by 40%.
- Integrated internal and third party REST APIs using Axios and implemented realtime Socket.IO features for live updates and collaboration workflows.
- Improved frontend performance by reducing unnecessary React rerenders and optimizing component boundaries across data heavy views, resulting in 30% faster page load speed.

Technical Skills

Core: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, SASS
State & Data: Redux Toolkit, Zustand, TanStack Query, Context API, REST APIs, Axios, WebSockets, Socket.IO
UI & Accessibility: Tailwind CSS, Material UI, Shadcn UI, Bootstrap, Responsive Design, Web Accessibility
Performance: Core Web Vitals, Performance Optimization, Code Splitting, Lazy Loading, Web Application Metrics
Testing: Jest, React Testing Library, Unit Testing, Component Testing
Performance: Web Vitals, Performance Optimization, Code Splitting, Lazy Loading, Web Application Metrics
Backend & Database: Node.js, Express.js, MongoDB
Authentication & Security: RBAC, Authentication, Authorization, Protected Routes, OAuth, NextAuth
Tools: Git, GitHub, Vercel, i18next, Chrome DevTools, Postman
Professional: Communication, Cross functional Collaboration, Independent Problem Solving, Technical Documentation and Mentoring.

Certifications

Claude Code 101 *Anthropic*
Learned AI assisted coding workflows and effective use of Claude Code.
Claude Code in Action *Anthropic*
Practiced agentic coding, tool integration, and structured development workflows.
AI Fluency Framework and Foundations *Anthropic*
Studied responsible AI use, effective collaboration, and critical evaluation of AI outputs.

Selected Projects

AI SpEd Insight Platform *React.js, Next.js, TypeScript, TanStack Query, WebSockets*

- Owned frontend delivery for a multirole platform with RBAC, protected routing, and 4 role specific dashboards.
- Built end to end IEP workflows and realtime extraction and scoring updates using TanStack Query and WebSockets.
- Supported 500 active users and thousands of daily requests while reducing manual data entry and IEP workflow time by 80%.

Loadout Marketplace Platform *React.js, Next.js, TypeScript, REST APIs, WebSockets*

- Delivered a multirole marketplace with separate buyer, seller, and operator experiences using RBAC and protected routes.
- Implemented product listings, category browsing, saved products, seller profiles, ratings, realtime chat, notifications, and API driven workflows.

DealLink Bilingual Portal *React.js, Redux Toolkit, Tailwind CSS, i18next*

- Built a bilingual English and Arabic web portal with full RTL support and reusable responsive components across both locales.
- Implemented shared state and UI patterns for language switching while maintaining consistent navigation, forms, and responsive layouts.

Pixora AI Photo Editor *Next.js, React.js, TypeScript, Prisma, MongoDB, NextAuth, Stripe*

- Built an AI powered photo editing application with Google OAuth authentication with Prisma and MongoDB based usage tracking.
- Integrated ImageKit for signed uploads and AI driven image transformations with usage limits for Free and Pro plans.
- Implemented Stripe Checkout and webhooks for subscription management and automated quota enforcement.

Movie & TV Streaming Discovery App *React.js, Redux Toolkit, React Router, Axios, Vite*

- Built a responsive movie and TV discovery platform with search, trending content, genre exploration, and dynamic detail pages using React.js and Redux Toolkit.
- Integrated the TMDB REST API using Axios for movie details, cast, crew, trailers, and metadata with trailer playback using React Player.
- Improved UX and performance with infinite scrolling, lazy image loading, skeleton loaders, circular ratings, responsive SCSS, and a custom 404 page.

Education

COMSATS University Islamabad *Feb 2022*

Bachelor of Science in Computer Science (BSCS)
